

Reconsideration of this application and pending claims in view of the amendments and discussion below is respectfully requested.

**IN THE SPECIFICATION**

At page 1, line 1, please enter the amended title, the amendments to which are provided in Appendix I.

**CASSAVA VEIN MOSAIC VIRUS ~~PROMOTER~~ NUCLEIC ACID SEQUENCES  
AND EXPRESSION VECTORS**

*ALREADY DONE*  
At pages 77 to 91, please delete the Sequence Listing provided.

At page 92-94, please delete the original page numbers of the claims on pages 92-94 as identified in the Corrected Version of the International Application and renumber them consecutively with new page numbers 77-79.

Please enter the ~~Abstract~~, provided in the enclosed response, on page 80.

**IN THE CLAIMS**

Please cancel claims 10-15.

Please enter the amended claims below, the amendments of which are provided in Appendix I.

*SUB F1*  
*BI*  
1. (Amended) An isolated nucleic acid molecule comprising a promoter nucleotide sequence that initiates transcription of an operably linked heterologous nucleic acid sequence in a plant cell wherein said nucleotide sequence has at least 80% identity to 18 sequential nucleotides of the cassava vein mosaic virus (CsVMV) promoter shown in SEQ ID NO 3 (pA).
